OBJECTIVE

To move to a software engineering position at a company that uses modern practices to rapidly develop well written, large scale applications.

TECHNICAL EXPERIENCE

KAPSCH TRAFFICCOM   August 2017 - Present
Duluth, GA
Software Engineer

- Worked on a traffic management application built with Tomcat, Swing, and PostgreSQL.
- Focused on scaling out architecture to handle country-sized loads.
- Implemented some device protocols including NTCIP and TMDD using SOAP and REST.
- Defined requirements with systems engineers to plan project delivery and product stability.

ELAVON INC.   January 2015 - May 2015
2 Concourse Parkway, Atlanta, GA   January 2016 - May 2016
Testing and Automation Intern

- Worked on multiple Scrum teams running and writing manual and automated tests.
- Co-directed day-long performance tests for web APIs hosted on Solaris.

WEB DEVELOPMENT
jackomueller-site   November 2019

- Node.js with React framework, hosted by AWS.

kmuellercounseling.com   Summer 2014
- Javascript and PHP implementation, no framework, hosted by GoDaddy.

MOBILE DEVELOPMENT
Car Care   August 2016 - May 2017

- Android app that interfaces with OBDII protocol adapter.

EDUCATION

GEORGIA TECH, Atlanta, GA   August 2013 - May 2017
MAJOR: Computer Science
GPA: 3.72
